The new generation of sliding glass door systems

MasterTrack® Sliding Doors

Maximum comfort. Minimal installation effort.

NEW STANDARDS IN TECHNOLOGY, DESIGN AND COMFORT

Modern interior design calls for holistic room concepts that combine minimalist design with maximum comfort. While good design is recognisable at first glance, comfort is usually in the detail and only becomes clear with use.

This is also the case with the high-tech solution from MasterTrack®. The high-quality look of the system goes hand in hand with sophisticated sliding door technology. It is made up of three components: track, roller system and clamping mechanism, and makes both installation and use particularly easy.

Using sliding glass doors is not only a space-saving design device but they are also ideal as room dividers and visual features in generously designed living areas. This is the case for classic wall mounting, as a telescopic solution or for mounting flush with the ceiling.

With MasterTrack® you have the right system for every application.

MASTERTRACK® FT

MASTERTRACK® BT

ADDITIONAL PRODUCTS

MASTERTRACK® FT

With MasterTrack® FT, Bohle offers a high-tech complete solution for sliding door systems that impresses with revolutionary running gear and noticeable smoothness. The special feature: the entire assembly requires only a few simple steps. Installation is quick, intuitive and cost-saving.

Solid metal frame

The solid, continuous metal frame ensures that the damper always remains precisely in its guide.

Safe anti-jump protection

The protective mechanism ensures reliable protection against door jumping, even with a powerful swing.

Unique roller system

High-quality ball bearings and large castors ensure a noticeable lightness and unique smoothness.

Easy mounting from the front

Mounting is conveniently done from the front. From there, all adjustment options such as the height setting, the positioning of the dampener and the anti-lift device can be reached quite comfortably.

MASTERTRACK® BT

The special design of the MasterTrack® BT sliding door series is used when the installation requires more than a simple ceiling or wall mounting. With MasterTrack® BT's modular system, there are no limits to the room design. With only a few individual components and the compact track in which the glass clamp is located below the carriage, single and multi-panel doors as well as flush ceiling designs can be installed in no time at all.

Compact running track

Suitable for various applications, for example, as a two- or three-panel telescopic solution or for flush ceiling installation.

Rollers with retraction damping

The sliding door is gently and smoothly slowed down in one movement by the dampers. One retraction damper replaces one standard runner.

Glass clamp

For most MasterTrack® BT applications, including classic wall and ceiling mounting as well as the telescopic solution.
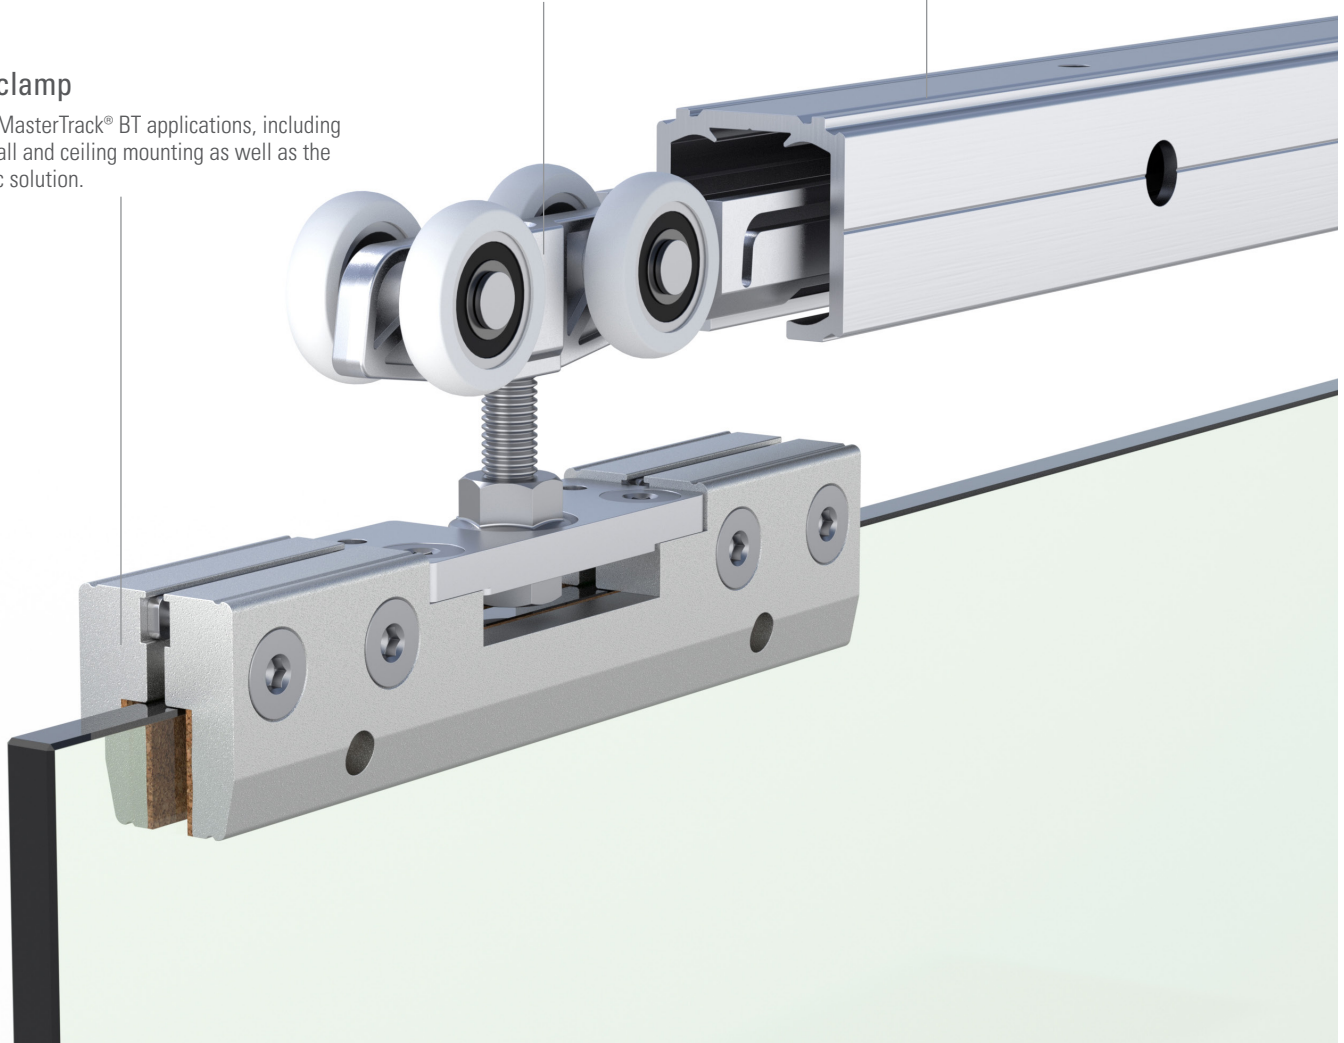

MASTERTRACK® FT
WALL MOUNT

Product highlights

- Impressively smooth running
- Smooth closing mechanism
- Safe anti-jump protection
- Elegant appearance in the weight classes 176 lbs and 330 lbs
- Intuitive and cost-saving assembly
- All settings conveniently accessible from the front
- Modular design in all weight classes
- Metal shock absorbers with high-quality hydraulics and double-sided
- Synchronously opening systems possible

MasterTrack® FT Accessories

Bohle MasterTrack® FT Carriage Set Including Damping Mechanism
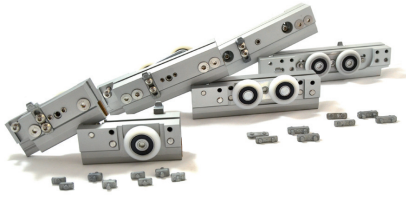

Can be used to upgrade complete door kits to double door systems. The innovative damper slows down the sliding door softly and seamlessly in one movement. The dampers are always constructed identically, ranging from the light to the heavy weight classes. The only difference: they vary in length in order to enable optimal damping and retracting of the different weight classes.

Bohle Duplocoll®

Product attributes:
- Thickness: 1/8" (3 mm)
- Color: Transparent
- Roll Length: 39' 4-7/16" (12 m)

- For many different applications, such as all-glass partition walls, showers, furniture, and more
- For many different materials, such as glass, plastic, aluminum, wood, or ceramic
- High transparency due to a light refractive index virtually identical to glass
- Antimicrobial effect inhibits the growth of microorganisms
- Resistant to chemicals and softeners
- Excellent initial tack, lasting ultimate bonding strength
- Elongation of up to 500% and highly split resistant
- By sealing the edges of the adhesive tape, Duplocoll® becomes dry after adhesion and resistant to external influences
- Also suitable for rough surfaces. The viscoelastic adhesive film distributes evenly across rough surfaces.

Max. allowable continuous temperature: -40 °F to + 300 °F (-40 °C to + 150 °C)
